IN THE NAME OF GOD

Don't give up your dreams!

Message from Chancellor

Iran has been the cradle of science and art for more than a thousand years, and in these two fields, it has dedicated famous scientists and artists to human society. The share of Markazi province in introducing educated men and women in the field of various sciences, especially medical science, has not been small. The existence of 7 universities in Markazi province and at the top of them Arak University of Medical Sciences (AUMS) as the main trustee of medical education and also a provider of health services shows the importance of medical sciences and other sciences in the central part of Iran.

At present, AUMS with 7 faculties and 46 fields of study, has been able to attract over 4200 students, and of course the share of international students has been very small so far, but fortunately the potential and readiness is now available at the university to demonstrate its ability to educate international students. As the President of Arak University of Medical Sciences, while welcoming international students, I would like to say that if you choose AUMS as your place of study, you can be sure that by choosing this university, you will create a very attractive and new experience for yourself. As president of AUMS on behalf of the board of directors and all faculty colleagues, warmly welcome all those interested in AUMS.

Dr. Seyed Mohammad Jamalian

Chancellor of AUMS

Message from

Vice Chancellor for Education

Arak University of Medical Sciences, with more than 35 years of education in medical sciences, having capable and experienced professors, educational infrastructure such as laboratories, research centers, library, reading room, high internet bandwidth, access to banks Information, equipped teaching and research hospitals, is one of the leading universities in the Islamic Republic of Iran. The university is located in a developed city, 300 km from the capital.

Arak University of Medical Sciences in general policy and vision in order to strengthen and develop effective international scientific and cultural interactions in attracting top students from other countries, introducing the university as one of the leading centers of higher education in international forums, expanding scientific relations and the culture of the Islamic Republic of Iran with other countries of the world through students, providing a suitable platform for introducing the achievements, dissemination and development of the rich Iranian-Islamic culture, has accepted qualified international students.

According to the approval of the Ministry of Health and Medical Education, Arak University of Medical Sciences can attract foreign students in the form of free admission in different fields with special conditions. Admission of students in a wide range of different courses from residency, Ph.D., general doctorate (in medicine and dentistry), master's degree, bachelor's courses and also short-term skills courses learning extends.

As the Vice Chancellor for Education of the University and on behalf of my faculty colleagues, I suggest studying in the Islamic Republic of Iran and Arak University of Medical Sciences to all those interested in pursuing higher education.

Dr. Saeed Changizi Ashtiani

Vice Chancellor for Education

Message from Manager of International Affaires

International Affairs Management is one of the youngest departments of Arak University of Medical Sciences, which is responsible for creating a two-way communication bridge between inside and outside the university. Over the course of 16 months, our small team was able to provide relatively large core infrastructures to connect with the university.

Over the course of 16 months, our small team was able to provide a relatively large core infrastructure to connect with the university. At present, it is possible for organizations, universities, faculty members and students to communicate with Arak University of Medical Sciences, and it is also possible for students, in addition to obtaining the necessary information about their favorite field of study, they are able to register online and upload their documents on the university portal.

As the Director of International Affairs of Arak University of Medical Sciences, I would like to invite all students to choose Arak University of Medical Sciences to continue their studies and add a new and exciting experience to your studies.

About Arak City

Markazi Province

Markazi province is one of the 31 provinces of Iran. The word Markazi means central in Persian. Its population is estimated at 1.41 million. The present borders of the province date to the 1977, when the province was split into the current Markazi and the Tehran Province, with portions being annexed by Isfahan, Semnan and Zanjan Province.

The major cities of the province are: Arak, Ashtian, Delijan, Farahan, Khomein, Khondab, Mahallat, Tafresh, Saveh, Shazand and Zarandiyeh.

ARAK

Arak is one of the largest cities in the central west part of Iran and is the capital of the Markazi Province with a population about 700000 people that makes it the 20th populated city of Iran.

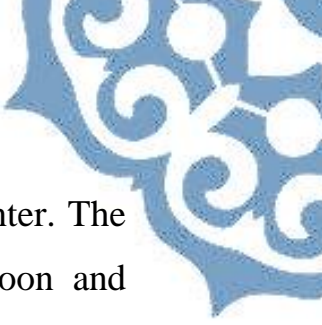

It is a major industrial city hosting several industrial factories including: Machine Sazi of Arak, Iranian Aluminum Company: (These factories produce nearly half of the needs of the country in steel, petrochemical, and locomotive industries.)

Climate

Arak has climate characteristics of Central Plateau of Iran that is, in general, relatively hot and dry in summer, windy and cool in autumn, cold and snowy in winter, and mild in spring. Its maximum temperature may raise up to 35 degrees

ARAK
Ancient Bazaar

Celsius in summer and drop to below -5 to -10 degrees Celsius in winter. The mountains surrounding south, west and east of Arak, Meygan Lagoon and Farahan Plain have affected the climate of Arak with unique characteristics. Winter is often long and varies from 4 to 6 months and Spring and Summer are short. Summer happens in June, July and August. Frost days may last 65 to 120 days and the annual rainfall is around 230 mm to 638 mm with the average amount of 300 mm per year. The annual relative humidity is 46%.

Natural Attractions

Meygan Lagoon: This lagoon with an area of 25 hectares is located 15 kilometers away in the North East of Arak and in the south of the city of Davoodabad. Due to the diversity of migratory birds in the area, this lagoon has become one of the best eco-tourist places in Arak.

Walnut Valley tourism area: The region has an area of 100 hectares located in the south of Arak. Weather is wonderful and nature is intact.

Takhte-e-sadat tourism region (Karahroud and Senejan gardens): One of the natural attractions with an area of 100 hectares and located in the nearby of Karahroud and Senejan district. Springs, Fruit gardens and Karahroud Sadat tomb are the tourist attractions.

Recreational area of mountains (Kooch-e-Sorkhe): It is another recreational area located adjacent to Walnut Valley tourism area.

Health centers

University health centers of ValiAsr Hospital, Amir Al-Mo'menin Hospital, Ayatollah Khansary Hospital, Amir Kabir Hospital, Ayatollah Taleghani Hospital, Imam Khomeini Social Security Hospital and Qods and Sina Private Hospitals are the main Healthcare centers in Arak city.

ARAK
Meyghan Lagoon

ARAK
Chahar Fasl Museum

Centers for Studies in Higher Education

Arak city as an Industrial and metropolis has 7 universities and higher education centers including: Arak University of Medical Sciences, University of Arak, Arak University of Technology, Azad University of Arak, Payam Noor University, Arak Farhangian University and Arak Comprehensive University of Applied Sciences.

Infrastructure of the city

Arak has two infrastructures, one is modern and another one is related to ancient. These two infrastructures can be found nearby each other for example: while you can visit the ancient BAZAR in the central part of the city you can easily access to modern malls and buildings soon that makes Arak for walking, attractive.

The Bazaar of Arak is one of the first constructed buildings in the city of Arak

The bazaar complex, containing a public bath, a mosque, water reservoirs, Passages and Caravansary, was built at the time of Fath-Ali Shah Qajar and by Yusef Khan-e Gorji, in the middle of Sultan Abad (Arak's former name). This bazaar is centered at Chahr soogh, which is the junction of two north-south and east-west paths that end to four ancient city gates

Arak University of Medical Sciences

Schools

Arak University of Medical Sciences is in ARAK city which is located in the center of Iran and is more than thirty-five years old, where the faculties of medicine, dentistry, nursing, paramedical, health, and rehabilitation teach and train students.

September & February

About

Medicine is the science and practice of establishing the diagnosis, prognosis, treatment, and prevention of disease. Medicine encompasses a variety of health care practices evolved to maintain and restore health by the prevention and treatment of illness. Medicine has existed for thousands of years during most of which it was an art (an area of skill and knowledge) frequently having connections to the religious and philosophical beliefs of local culture. For example, a medicine man would apply herbs and say prayers for healing, or an ancient philosopher and physician would apply bloodletting according to the theories of humorism.

About

Technologic Development, Individual Life Style Changes and more exposure to Environment Risk factors have changed the picture of Disease pattern (Communicable, no communicable).

On the other hand, extreme interest of Internists for graduating in sub-specialties of internal medicine, and restricting their academic and professional activities to their subspecialties, and large space allocation in Public Hospital to the equipment needed for these subspecialties are a challenging problem for the health system and Academic Authorities and Internal Medicine Science itself. In this regard with considering widespread borders of our country, community needs, General Internal Medicine with its Holistic View is in serious need for more support and attention.

About

General surgery is a branch of medicine that is about surgical management of diseases of different parts of human body. The main emphasis of the field is on traumas, diseases of gastrointestinal tract, abdomen, neck, endocrine system, peripheral arteries, soft tissues and breasts. It is a surgical specialty that focuses on abdominal contents including esophagus, stomach, small intestine, large intestine, liver, pancreas, gallbladder, appendix and bile ducts, and often the thyroid gland (depending on local referral patterns). They also deal with diseases involving the skin, breast, soft tissue, trauma, Peripheral artery disease and hernias and perform endoscopic procedures such as gastroscopy and colonoscopy.

September & February

About

Obstetrics and Gynecology (commonly known as OB/GYN, OBG, O&G or Obs & Gynae) is the medical specialty that deals with obstetrics and gynecology. The postgraduate training program for both aspects is unified. An obstetrician-gynecologist, or OB-GYN, is a healthcare professional that specializes in female reproductive health. People trained as OB-GYNs specialize in both obstetrics and gynecology: obstetrics involves working with pregnant women, including delivering babies. Gynecology or gynecology is the medical practice dealing with the health of the female reproductive system.

About

Emergency medicine are of strategic importance in the health service systems. Although the complexity of medicine and attention of medical experts toward specialized issues have led to the development of specialty and subspecialty fields, these issues have also improved the quality of emergency services. The idea to establish emergency medicine came from such problems. Parallel to maintaining community based approach and considering the real needs of health system, the program has paid special attention to training of the graduates and has been developed on the basis of educational requirements. Emergency management system, unexpected event management, and pre-hospital emergency systems have been highlighted in this program.

About

Anatomy, a field in the biological sciences concerned with the identification and description of the body structures of living things. Gross anatomy involves the study of major body structures by dissection and observation and in its narrowest sense is concerned only with the human body. Microscopic anatomy involves the use of optical instruments in the study of the tissues of various structures, known as histology, and also in the study of cells. Anatomy is inherently tied to developmental biology, embryology, comparative anatomy, evolutionary biology, and phylogeny, as these are the processes by which anatomy is generated, both over immediate and long-term timescales.

About

The Emergency Medical Science (EMS) degree program trains and enables the individuals with the knowledge, skills and attributes to provide advanced emergency medical care as an entry-level paramedic for critical and emergent patients. A medical emergency is an acute injury or illness that poses an immediate risk to a person's life or long-term health, sometimes referred to as a situation risking "life or limb". These emergencies may require assistance from another, qualified person, as some of these emergencies, such as cardiovascular (heart), respiratory, and gastrointestinal cannot be dealt with by the victim themselves.

About

Radiation therapy (also called Radiotherapy) is a cancer treatment that uses high doses of radiation to kill cancer cells and shrink tumors. At low doses, radiation is used in X-rays to see inside your body, as with X-rays of patients' teeth or broken bones. A radiation therapist, therapeutic radiographer or radiotherapist is an allied health professional who works in the field of radiation oncology.

8-Submitting the receivable documents from the International Affairs Management and the related faculty for investigation and statement

Submitting the receivable documents from the international Affairs Management to the related faculty for investigation and statement

Deciding the applicant's study in the requested field and level considering the expert advice of the related faculty and general conditions of the applicant and if required, interviewing in the educational commission of the international relations council

Announcing the verdict of the educational commission of the international relations council to the vice-chancellorship for education and submitting the initial feedback to the applicant within 30 working days of receiving the document

Introducing the applicant to the educational services center of the Ministry of Health for statement through the vice-chancellorship for education

Enrolling the applicant and receiving the required document and some part of the tuition

Introducing the student to the vice-chancellorship for the education of the Ministry of Science to receive the student residence visa

Taking courses, paying the remaining annual tuition and starting studying in the first semester

Introducing the student to the related faculty to use the welfare services (food and dormitory)

Stages of admission of the student in Arak University of Medical Sciences

Completing the student admission form in the university

1. Scanning the educational degrees in which field, date of graduation, place of education and transcript of the applicant are inserted. The score can be based on the English alphabets or percentage or GPA or general description or out of 20. Anyway, the effort will be made to allow talented and studious students to continue studying.
2. Scanning all pages of the applicant's passport
3. Scanning new photo of the applicant (which has been taken in the recent year) with high resolution
4. Presenting the motivation letter (necessary for MSc and PhD applicants). This letter should be prepared in Persian or English by all applicants in this university. In this letter, the motivation of the applicant for studying the desired field and Arak University of Medical Sciences should be mentioned. The abilities and certificates received by the applicant in different fields such as computers and software, art, sport, and different technologies should be also inserted.
5. To study the postgraduate course, at least two professors who are fully aware of education and research abilities, communication skills and creativities should present a recommendation letter.
6. The non-English speaking applicants shall present TOEFL, IELTS or MCHE certificate. The minimum scores for the said tests are 480, 5.5, and 50, respectively (this degree is required for the applicant of Ph.D. courses). In case the person lacks this degree, he/she can start studying conditionally but shall present the said degree before entering the research course(thesis).
7. The CV in which the applicant gives a complete description of his/her education, work experiences, research activities and scientific publications based on the sample in the International Affairs Management portal (this degree is required for the applicants in postgraduate studies.).

All documents shall be uploaded in the page “Apply to AUMS” on the portal of Arak University of Medical Sciences at <http://www.arakmu.ac.ir/en>. These requests will be investigated and the initial reply to the applicants will be announced based on the tracking code within 30 days after submitting the documents.
